Dear [REDACTED]

We are [REDACTED] and we are working for one of the most important news magazine, called [REDACTED], that can be compared to "60 Minutes". We are preparing a 52 minutes documentary on cloning on an affair that took place in 2001 concerning a company called Clonaid. This company told the medias that they were going to clone a human being. They had a laboratory in Nitro (West Virginia), that the FDA found and that was searched by the FBI. We would like to interview the FBI agents who made this search, tell us what happened, what they found, who was in this lab. The interview will last about 30 minutes and will take place wherever they want. We come next week to the USA to realize this documentary. If you need more info don't hesitate to call me at this number : [REDACTED]

Thank you very much for your help

Best regards

[REDACTED]
